MORBIDITY REPORT

SHORE STATIONS IN CONTINENTAL UNITED STATES

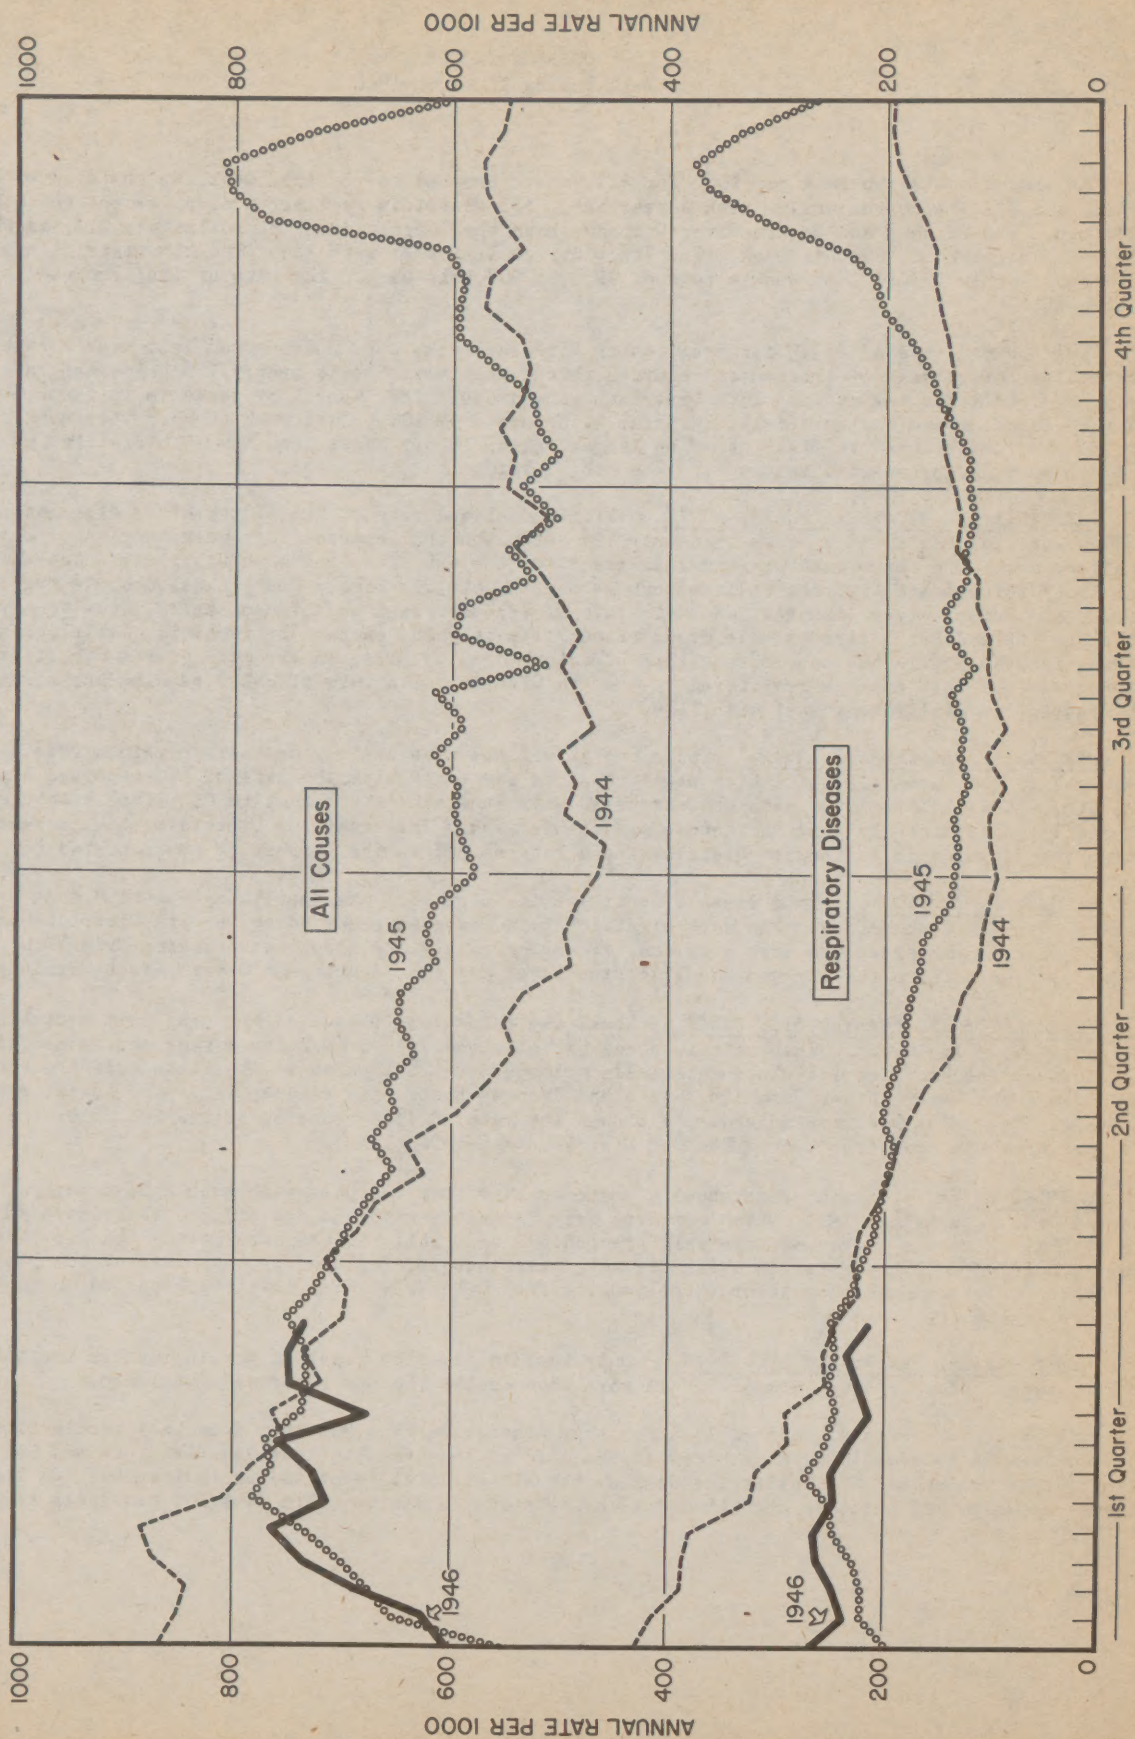

WEEK ENDING _____ 19__
REPORT NO. _____

NOTED—THE INFORMATION IN THIS REPORT IS NOT TO BE COMMUNICATED
EXTRA OR SUBJECT TO THE PRESS OR TO ANYONE NOT IN THE ARMED FORCES

ADMISSION RATES—ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES—1944, 1945, 1946

CURRENT TRENDS
Week Ending 16 March 1946

The annual admission rate per 1000 for All Causes dropped to 735 this week, as compared with 749 the week before, and 752 the corresponding week a year ago. All Districts register a drop, except the 6th, 8th, and 11th Districts. The Potomac and Severn River Commands have the largest drop, approximately 21%, as the rate passes from 593 last week to 469 this week. The 7th District is lowest with 365. The 6th District has the largest increase, roughly 25% of last week's rate of 725, to 903 this week. The rate of 1153 reported by the 5th District is highest.

The combined rate of 213.9 for Respiratory Diseases marks a 7.6% drop from last week's rate of 231.5, and is back to the lowest mark of the season recorded three weeks ago. It is nearly 15% below the rate of 251 reported a year ago. All but the 6th and 13th Districts show drops. The largest of these is in the Potomac and Severn River Commands, where the rate falls 39.5% as it passes from 108.5 last week to 65.6 this week. The lowest rate is 61.8 reported by the 7th District. The largest gain, 11.5%, comes from the 13th District as its rate rises to 142.2 from 127.5 reported last week. The 5th District leads with 463.2.

INFLUENZA AND CATARRHAL FEVER, ACUTE. With a combined rate of 123.8, these two diseases have reached a new low for the season. That rate is nearly 12% below the one reported last week, and about 21% below the one of a year ago. The improvement is general except for the 4th, 6th, and 12th Districts which show gains ranging from 16.2% for the 4th District to less than 1% for the 6th District. The largest drop is registered by the Potomac and Severn River Commands, as their rate of 74.4 for last week decreases by 38.4% to a value of 45.8, while the 7th and 9th Districts have drops of approximately 20% each. The remaining Districts show decreases ranging from 16.5%, in the case of the 13th District, down to 5.7%, in the case of the 8th District. Although a 13% drop from last week is registered by the 5th District, its rate of 282.0 remains the highest, while the 7th District is still the lowest with 31.4.

PNEUMONIA, BRONCHO AND LOBAR. These two infections rise sharply as their combined rate passes from 1.3 last week to 2.3; however, the latter still compares favorably with the rate of 4.0 reported a year ago. The 6th, 8th, and 12th Districts register decreases, while the 4th, 7th, and 13th Districts remain stationary. The 4th and 13th Districts have no incidences again this week. The remaining Districts show increases, the most noteworthy of which is in the 5th District whose rate of 5.7 is the largest of any reported for the week.

PNEUMONIA, ATYPICAL. This disease continues its zigzagging course, with a rate of 4.4 as against 3.5 last week and 4.9 the week before. The most significant increase is recorded by the 6th District whose rate soars to 23.2 from 2.5 reported the week previous. The other Districts show rates ranging from 12.0, for the 11th District, down to zero for the 4th and 13th Districts, and the Potomac and Severn River Commands.

TONSILLITIS AND PHARYNGITIS, ACUTE. These two infections show a slight drop with a combined rate of 83.4 as against 86.3 last week. That rate is about 5% below the one of 88.0 for a year ago. Most significant drops are shown by the 4th District whose rate falls from 59.3 to 26.1 which is less than half the former; likewise, the Potomac and Severn River Commands have a 45% drop as their rate reaches 18.0, the lowest one reported for the week. The gains are more moderate, although the rate of 76.3 reported by the 13th District marks a nearly 57% jump from the preceding week. The 5th District leads with 171.4.

SCARLET FEVER. This disease shows a sharp decline from the past week when a high mark of the season was reached; its rate is now 19.3, which compares very favorably with the one of 35.0 reported a year ago. The gains are slight, while the improvement is well pronounced, especially in the case of the 9th District whose rate dropped from 80.8 to 48.6. The latter is still highest, nevertheless, followed by the rates of the 5th and 11th Districts. The other Districts have much lower rates ranging from 0 to 4.7. Six Districts reported no incidences as against only two last week.

CEREBROSPINAL FEVER, MENINGOCOCCIC. Only the 5th District reported any incidences for this disease in the current week. However, its rate of 0.9 is more than double the one reported a week ago.

MEASLES. The present rate of 14.8 for this disease marks a 20% drop from last week's high mark of 18.5. The improvement is especially pronounced in the case of the 4th, 5th, and 9th Districts and the Potomac and Severn River Commands. The latter, as well as the 4th District, reported no incidences. On the other hand, the disease shows marked gains in the 6th and 12th Districts, while the 11th District continues to hold the lead with the high rate of 40.9.
